September, number 1

THE KICK OFF MEETING OF THE PROJECT

During the 28th and 29th of September, the partners of the European Project "**EUROPEAN YOUTH JOBSEEKERS COMMUNITY**" met in Valladolid, Spain for the first international meeting. During the two days of the meeting the details of the project and the forms of participation of all the partners were discussed. The dates of the next meetings and of the training week (which is going to take place in Campobasso, Italy) were also scheduled.

EUROPEAN YOUTH JOBSEEKERS COMMUNITY

What is this Project about

The main aim of this Project is to promote the exchange of good practices in the field of networking-based activities for young unemployed people. By taking part in several EU and national projects, consortium partners have observed that traditional employment services tend to result ineffective in comparison with more innovative, informal and flexible solutions such as those based on networking and training support.

YOUTH-WORKNET proposes the exchange of a set of networking-based practices to be transferred and implemented in different contexts with similar needs.
